Summary

A Full Stack Web Developer with over 6 years of experience, I specialize in building robust, scalable solutions using JavaScript, TypeScript, PHP, Node.js, and Python, alongside modern frameworks like React and Vue. My background in journalism and education provides a unique, user-centric perspective that enriches my technical work, allowing me to bridge the gap between complex technology and meaningful human experiences.

Recently, I've focused on the transformative potential of AI in software development. I am passionate about exploring and implementing Agentic AI to enhance productivity and foster innovation. As a key advocate for tools like GitHub Copilot, I've had the opportunity to mentor colleagues and lead initiatives that drive efficiency—such as spearheading a migration to Vite that significantly improved our team's build and deployment times.

I am a collaborative, proactive problem-solver, driven by the belief that technology and art can create powerful new ways for us to connect. I am committed to continuous learning and leveraging cutting-edge tools to build the next generation of digital solutions.

Experience

Accenture Argentina

Full Stack Developer / Packaged App Development Senior Analyst

February 2025 - Present (10 months) | Argentina

- Led critical technical migrations including Webpack to Vite migration, reducing build and deployment times by 3-4x and significantly improving team productivity and development efficiency.
 - Pioneered AI adoption initiatives by conducting comprehensive GitHub Copilot knowledge transfer sessions, impacting 160+ colleagues across the portfolio and driving organization-wide adoption of generative AI development tools.
 - Delivered proactive maintenance solutions by implementing strategic approaches that shifted teams from reactive to proactive mindsets, integrating security updates, dependency management, and code quality improvements into regular sprint cycles.
 - Excelled in rapid technical adaptation by quickly mastering complex portfolio applications and contributing meaningfully to React component development within months of joining.
-

INAMU - National Institute of Music (Argentina)

Full Stack Developer

January 2024 - February 2025 (1 year 2 months) | Buenos Aires Province, Argentina

- Developed and maintained web applications for INAMU, enhancing user experience for musicians in Argentina.
 - Utilized PHP, CodeIgniter, HTML, CSS, MySQL, and Docker to build functional features.
 - Collaborated with the music community to ensure solutions met their needs and expectations.
-

Cambá - Technology Lab

Full Stack Developer / Partner

April 2023 - February 2025 (1 year 11 months) | Greater Buenos Aires

- Collaborated with INAMU to develop and maintain web applications for the music industry in Argentina.
 - Enhanced the AdminSE project by migrating its frontend to Vue.js, improving user experience and performance.
 - Contributed to the 'Teamwork and Groups' feature for Colmena Software, supporting local media productions.
-

AdminSE - Comprehensive Insurance Management Software

Frontend Developer

October 2022 - July 2024 (1 year 10 months) | Buenos Aires y alrededores

- Spearheaded the migration of AdminSE's frontend to Vue 3, enhancing performance and user experience.
 - Utilized PrimeVue for UI components, ensuring a modern and responsive design.
 - Implemented Pinia for state management and Axios for efficient HTTP requests.
 - Leveraged Node.js with npm for streamlined package management, aligning with contemporary web standards.
-

Contract & Freelance Software Engineering

Full Stack Developer

March 2021 - January 2025 | Various Locations

DW Akademie (Contract) | Dec 2024 - Jan 2025 - Developed a new feature for Teamwork and Groups within Colmena Software, enhancing digital tools for local media productions. - Collaborated with cross-functional teams to ensure seamless integration of features.

Teambre9 (Contract) | Jun 2022 - Mar 2023 - Developed a Minimum Viable Product (MVP) for a custom sport t-shirt design project utilizing Three.js for 3D features. - Collaborated with another developer to design and build the MVP while managing client relationships.

Skydropx (Contract) | Apr 2022 - Jun 2022 - Developed PoC of HR wiki utilizing wiki.js, Node.js, TypeScript, Vue 3, JavaScript, and CSS. - Collaborated with cross-functional teams to enhance user experience and streamline HR processes.

GPE Sistemas (Contract) | May 2021 - Mar 2022 - Developed Web Microservices for IoT devices using NestJS and MongoDB, enhancing backend capabilities. - Integrated microservices with Chirpstack Network Server and LoraWan IoT Devices. - Proposed NestJS as the company's standard backend framework.

B2LEARN (Freelance) | Mar 2021 - Jul 2021 - Collaborated as a freelance Full Stack Developer focusing on responsive design themes. - Designed a new WordPress theme using Elementor Pro, significantly improving the platform's aesthetics.

Previous Career: Journalism & Education (2004 - 2014)

Prior experience includes roles as a Journalist, Editor, and Spanish Teacher for various organizations including Rolling Stone, Diario Clarín, and Página/12.
